## Company Profile

The Jinhua Zhongyi Furniture Co Ltd, renowned for its cutting-edge design expertise in school furniture, continues to stay ahead of emerging market trends. This ensures that our clientele remains engaged throughout the order development and supply phases, along with attractive pricing. We, as 'Jinhua Zhongyi', both manufacture and supply a wide range of school furniture, including benches, desks, chairs, moving chairs, folding chairs, and folding tables suitable for preschool to 12th grade, as well as for community colleges, technical and vocational schools, universities, trade fairs, cafeterias, convention centres, banquets, meeting facilities, and places of worship.

The company commenced its journey in 2008 and, in a short time, now excels in customised solutions for its followers, clients, and customers, providing tailored products that meet international benchmarks and standards. The company ensures that its items and products comply with the quality and safety requirements and preferences of each customer. This ability to choose and personalise its offerings enhances customer satisfaction and loyalty.

As environmental concerns gained prominence, the company has shifted its focus towards sustainability and corporate social responsibility (CSR). This phase allowed for the adaptation of eco-friendly manufacturing practices, sourcing sustainable materials, and implementing initiatives to give back to the community: to introduce newer furniture assortment options and empowerment passed from manufacturer to school management.

The company, a pioneer in advancing furniture manufacturing for modern classrooms, has been shaped by technological expertise, evolving pedagogical methods, and a growing emphasis on sustainability and student-centred learning. Looking forward, future growth in this sector is anticipated to be driven by innovation and product development, along with market diversification targeting areas beyond educational institutions and fostering partnerships with all stakeholders. A commitment to sustainability, enhanced and transparent engagement with customers, digital transformation to optimise operations, and focused employee development and training will further facilitate the better integration of technology, personalised learning solutions, and innovative design approaches that prioritise student engagement, comfort, and well-being. The company, nicknamed ZOIFUN, a legendary name in the industry, [www.zoifun.com](http://www.zoifun.com), appears poised for a significant leap in the days to come.

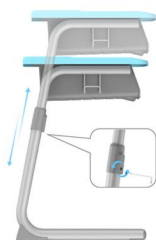

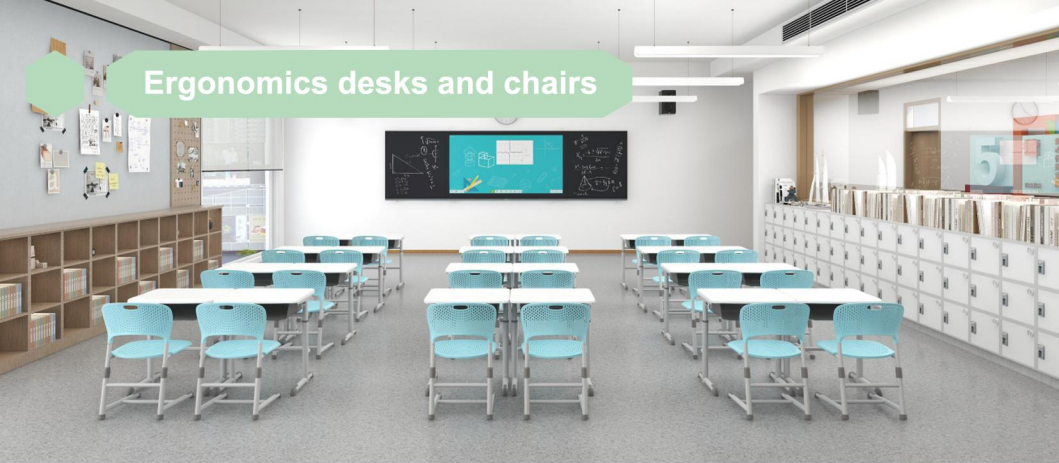

Our seating furniture is specifically designed to cater to the needs of both students and teachers. It promotes healthy posture, enhances the learning environment, and focuses on scientific design aspects, fostering a space where everyone can feel comfortable and focused.
