Truck hub unit 1

Hub bearing unit for trucks that is pre-adjusted, lubricated and sealed at the factory. Simpler housing and stub axle geometry is possible.

Truck hub unit 2

With a one-piece outer ring, pre-adjusted, greased and sealed as a unit with integrated flange. An ABS pulse ring is an option.

Truck matched unit

Equipped with two paired tapered roller bearings held together by a sheet metal clip ring for higher system stiffness.

Assembled truck matched unit

It is a complete wheel end with two paired tapered roller bearings assembled in a hub, greased and sealed. Compared to the truck matched unit the axial clearance is better controlled.
